

# Drawing with Code

For Students

Hi There! Did you know you can use code to make drawings that grow like trees or draw with your nose? *Drawing with Code* is about learning how to be creative with computer programming. Here are some resources to get started:

- All examples you see today are available to download and play with at: [github.com/crecord/DrawingWithCode-ScienceCenter](https://github.com/crecord/DrawingWithCode-ScienceCenter)
- Teach your self how to code! I promise you won't regret it. Check out [scratch.mit.edu](https://scratch.mit.edu) [processing.org](https://processing.org), or [hummingbirdkit.com](https://hummingbirdkit.com) to get started.
- Feel free to email me at [info@carolinerecord.com](mailto:info@carolinerecord.com) for advice on how to get started with creative coding.
